

ptx_thread_info::callstack_push

```
graph LR; A[ptx_thread_info::callstack_push] --> B[function_info::local_mem_framesize]
```

A diagram showing a call from the function `ptx_thread_info::callstack_push` to the function `function_info::local_mem_framesize`. The first function is in a grey box, and the second is in a white box. A blue arrow points from the first box to the second.

function_info::local
