

add_function_name

add_identifier

function_info::add
_param_name_type_size

```
graph LR; A[add_function_name] --> B[add_identifier]; B --> C[function_info::add_param_name_type_size];
```

The diagram illustrates a three-step process flow. It begins with a box labeled 'add_function_name', which points via a dark blue arrow to a second box labeled 'add_identifier'. This second box then points via another dark blue arrow to a third, larger box. The third box is shaded gray and contains the text 'function_info::add' on the first line and '_param_name_type_size' on the second line.
